

# FURNITURE

**1.** Waiting won't feel so tedious anymore thanks to **Encore's** Clipse Lounge Series. Integrate functional accessories such as power and data units with optional USB connectivity, and pick from a variety of base options such as fixed legs, castors, or swivel. Base finishes are available in standard Metallic Silver, Graphite, Satin Black, and Chrome. Add on a tablet that rotates 360 degrees.

**2.** Rally modular furniture from **Sauder Education** is a renewable lounge configured with the Sauder Smart Design System that secures components with hidden interlocking metal fasteners. It also features multiple arm styles and a variety of foot, leg, and base options.

**3.** **Three H's** sit-stand program, Upside, is truly unique in its proprietary custom design that integrates movable work surfaces cleanly and efficiently within its 1-inch panel system, without the need for base feet. It gives designers the ability to incorporate casegoods with workstations, freeing up space and heightening usability.

**4.** CH88 from **Coalesse** is a stacking chair with style, designed by Hans J. Wegner. Available with a wood or upholstered seat (Carl Hansen & Son fabric or leather) and metal legs with black paint, chrome, or stainless steel finish, the chair can stack four high. The chair's dimensions measure 30.25 inches (height) by 22.5 inches (width) by 17.5 inches.
