Rescape™ with MultiStations OS

Rescape is a workspace initiative that will continue to evolve at Three H. As designers and clients participate in the creation of new spaces and the way we work ('rescaping'), Three H will launch new materials, components and style features while seamlessly integrating a variety of office furniture designs.

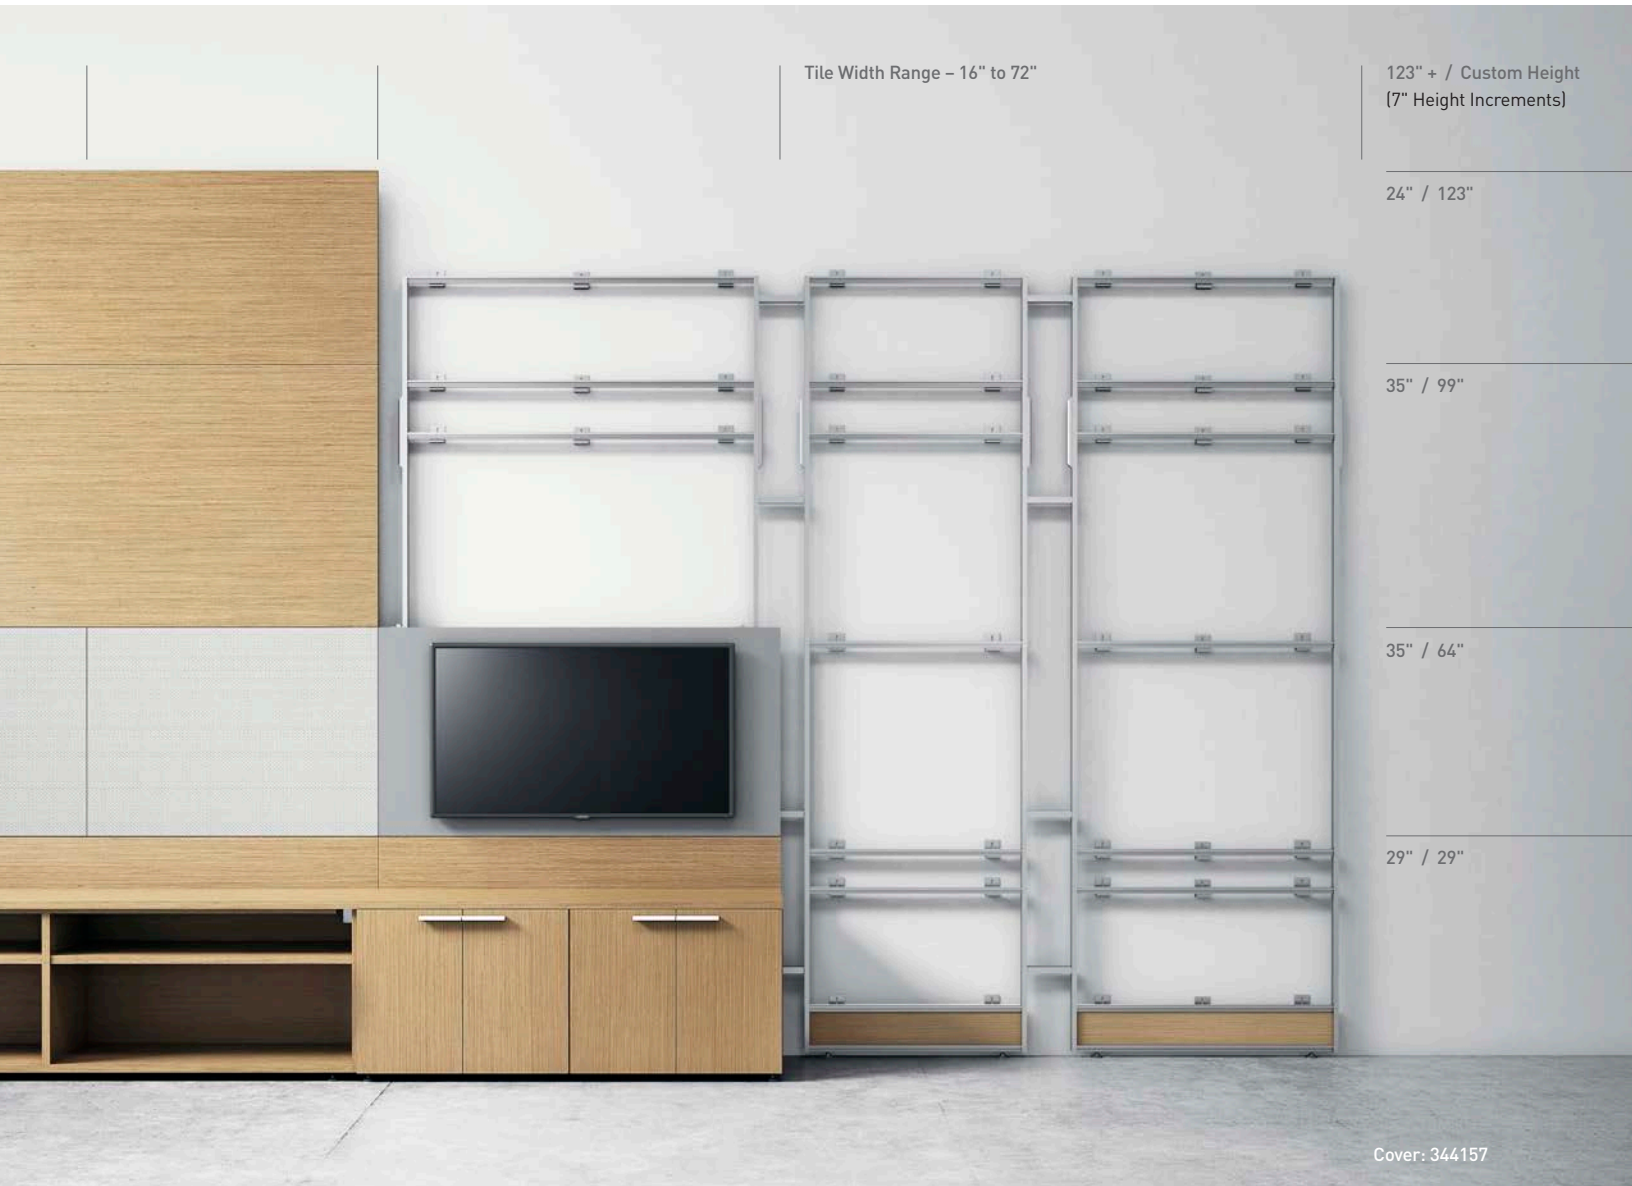

Rescape wall tiles shown here with MultiStations OS featuring proprietary panel-integrated height adjustable worksurfaces and new accessory options.

Rescape™

How it Works

Rescape wall tiles are not what are traditionally thought of as a set of components within a frame or features simply attached to walls. Rescape is a proprietary system developed by Three H that starts with a metal frame understructure that is fitted to a complete wall or a portion of a wall that is additionally supported by base levelers. Functional tile components then snap on to the frame structure.

Visit three-h.com/rescape for further specification information.
