OFFICE PLATFORM™
Create™

Designer: Jean Bourassa

Create Office Platform™ is a dynamically elegant single source platform on which four distinctive office design applications are built. Apps that are fundamental to the way efficient and intelligent offices now work.

CLUB, STUDIO, FORUM AND PARK...
Apps that provide creative design freedom with an impressively striking range of components; including desk-top, storage and panel options. Creating work environments perfectly tailored to individual tasks.

Designer Jean Bourassa has created this extensive new collection that blends broad functional performance with balanced proportions and refined detail. He has achieved this through integration and layering. From the baseline of a single platform components are added to shape the environment spanning the classic private office layout to the fashionable open landscape.

From the executive suite to collective work areas, Create™ is a new way forward in integrated office design.

CLUB

Tall elements, generous storage, and the impressive scale and impact of the desk design define the Club freestanding private office application. Styling options, evidenced by the choice of modesty panels and sleek aluminium desk frame, enhance the creation of suites tailored to the heightened aesthetic of today’s executive officers.

DETAILING. Beautiful can be Strong.
While the craft of the product is in the engineering, the art is in the details. The eye of the viewer is drawn along the new trimmed knife-edge of the surface. The curved symmetry of the legs and pulls in crafted anodized aluminium, uniquely designed for Create™, are in perfect balance with the horizontal architecture of the product.

STUDIO
Studio App is the single workstation. Manager’s offices for private or open spaces.

Clean and low in profile, selected minimal elements and lighter in scale are the marked characteristics of Studio. And like all Three H product, Studio can be styled from 31 carefully selected wood and solid color laminate options. Giving the appearance of natural wood with the additional benefit of durability in Greenguard approved laminate construction.

Both superior engineering and beauty are clearly visible in the crafted trim and arched design of the leg supports and pulls. The extruded aluminum structure ensures a long lasting quality while maintaining integrity over many reconfigurations.

DESIGN INTEGRATION
Studio, along with all the other Create™ apps, can seamlessly integrate panels from the existing MultiStations OS™ line by Three H to create privacy in open places. Further enhancing the Create™ platform with additional striking design elements.

The impression is sophisticated, dynamic and highly innovative. The blending of fabrics, glass, anodized aluminum and rich, wood-like laminates results in a creative, new look.

POWER/DATA
Optimized Solutions. Sheer Performance.
Create™ boasts a wide-range of power/data opportunities. New for Create™ is a desk-top clear aluminum pop-up module, with numerous power/data configurations. Every detail exudes top quality materials and precision craftsmanship.

For an embedded panel-based solution, the sophisticated PowerBox™, developed for MultiStations OS™ (see www.three-h.com/powerbox), can be integrated into any application.

And the budget-wise undersurface mounted cable management and grommet-based power/data option is always available for the elegantly simple and most value-based solution.

Explore layout ideas & a variety of typicals at: www.three-h.com/create
Create™ is scaled around people. Storage, panel and screen heights are sized to provide seated and/or standing privacy. The use of glass provides for sightlines and light – important elements in an effective design strategy.

New multi-directional storage along with a wide choice of overhead storage options and credenza configurations work together in a new language of multi-function, multi-purpose furniture that is easily assembled and re-configured.

Small groupings of 2 or unlimited clusters can be planned from a broad collection of storage and panel options to provide dedicated workspaces while maintaining more openness in design.

SCREENS AND STORAGE. Scaled to People.

The introduction of privacy screens provides additional delineation of workspaces in an open area while enhancing personal privacy. And to optimize the performance of the screens, a multi-purpose rail has been embedded to offer rail accessory, tray and hook support.

FORUM

Forum App is personal workstations in open plan. Collaborative team arrangements.

PARK

Park App is community-style workspaces. Much more than a Bench.

The most efficient and elegant desking design need not be a square table. And as demonstrated here, add creative storage options and achieve workspaces elevated in stature deserving of the best views in the office. Satisfying in styling, practical in application.

BY-THE-INCH. The Ultimate Design Freedom.

Three H is well known for its 1” increment sizing. Create™ is no exception. Create™ will accommodate any size requirement and live up to the “made-to-order” design philosophy and intelligent production process at the heart of Three H. And no less impressive is that deliveries are made in standard lead times.
