SPACE 346

A bold melding of form and function, **Cove** invites work and repose in equal measure. Accompanied by an ottoman, the oversize chair is generous enough to accommodate a variety of seating positions (and, of course, your laptop). The base—in steel, aluminum, or wood—can swivel in fixed, free, or return-to-center directions. And the soy-based rigid shell is padded with foam and can be upholstered in any of the firm's in-graded fabrics, or custom.

SPACE 345

Mark Müller's sleek **Nesting** tables do just that: Set them out as needed and then stack them out of sight until duty calls again. Beech legs with optional grooved cable channels are offered in three solid hues and 14 stains, while the steel frame comes finished in gray or white. Sizes include heights perfect for use as cocktail tables, desks, counters, and bars; high-pressure laminate tops ensure cleanup's a snap.
