MultiStations OS system panels and worksurfaces are available in a wide range of standard sizes, shapes and panel configurations that include clear or transparent glass, integrated tackboard, markerboard and rails.

Expandable, reconfigurable modular stations can be specified from stock sizes or sized by the inch to meet specific requirements where necessary.

OS components integrate seamlessly with standard Three H casework products and accessories for ultimate design freedom and flexibility. Modified system components are available for special purpose applications and where custom solutions are necessary. Contact your dealer or Three H representative for more information.
